Fewpips Funded Account Rules

We have specific rules for Fewpips CFD Funded Accounts to ensure a fair, transparent, and sustainable trading environment. These rules are designed to:

- **Protect traders and simulated capital:** By recommending risk limits, we help traders avoid large losses and encourage disciplined trading habits. This supports long-term growth rather than risky, short-term wins.

- **Maintain fairness:** Practices like latency trading, arbitrage, exploiting low-liquidity markets, and one-sided betting are banned because they give unfair advantages and undermine genuine skill-based trading.

- **Discourage gambling:** Excessive margin use (70%+) is considered gambling and is not allowed, as it exposes accounts to unnecessary risk and potential termination.

- **Promote consistency and professionalism:** We want traders to develop repeatable, disciplined strategies that lead to consistent success, rather than relying on loopholes or high-risk tactics .

Overall, these rules help create a level playing field, protect both traders and our simulated capital, and foster a professional trading environment focused on long-term success.

Fewpips Funded Account Rules

Fewpips 1-Step Funded Account Rules:

• Maximum Daily Loss Limit - 4%

• Maximum Loss Limit (MLL) - ***See Below***

• Minimum Trading Days - ***See Below***

• 40% Consistency Rule of Daily Profit.

• Profit Split: 80% up to 90%.

---

1. Daily Loss Rule

The Daily Loss Limit is calculated using the formula:

Start-of-day equity - the lowest floating equity of the day must not exceed the allowed percentage.

This rule applies to both open (floating) and closed trades.

Here are the Daily Loss Limits:
1. 1-Step: 4%

Example:
For a $100,000 Fewpips 1-Step Account:
The daily loss limit is 4%, which equals $4,000. If the trader starts the day at $100,000, the trader cannot lose more than $4,000 in total during that day. If the trader first makes a $2,000 profit, the daily limit increases to $6,000 for that day ($4,000 + $2,000 profit). If the total loss reaches that amount, including open trades, the account will be breached.

If the account is $100,000 with a 4% Daily Loss Limit and the trader loses $4,000 in one day, they will breach the Daily Loss Limit making the trader breach the account.

Example Visual:
- Start: $100,000 → Low: $97,200 → Loss: $2,800 → **OK**
- Start: $100,000 → Low: $95,600 → Loss: $4,400 → **Violation**

Fewpips Funded Account Rules

2. **Maximum Loss Limit**

The Maximum Loss Limit (MLL) is a trailing loss limit that moves up as the account makes profits, but it never moves down after losses, and it can never go above the starting balance.

On all Fewpips accounts, the MLL is a trailing Maximum Loss Limit.

Here are the Maximum Loss Limits:

Fewpips 1 - Step:

$5,000: 6%

$10,000: 7%

$25,000: 8%

$50,000: 9%

$100,000: 10%

Key points:

- It only increases with profit.
- It never decreases with losses.
- It is capped at the initial account balance.
- Withdrawals do not reset or reduce the MLL; it stays at the highest level it has ever reached.

Example:

For a $10,000 Fewpips 1-Step Account (7% trailing Maximum Loss Limit).

Start: Equity $10,000 → Maximum Loss Limit breach point = $9,300 (7% below $10,000).

- After +$200 profit: Equity $10,200 → Maximum Loss Limit moves up to $9,500.
- Then -$100 loss: Equity $10,100 → Maximum Loss Limit stays at $9,500 (it never moves down).
- Then +$300 profit: Equity $10,400 → Maximum Loss Limit moves up to $9,700
- Then +$400 profit: Equity $10,700 → Maximum Loss Limit reaches $10,000 (capped at the initial balance).

If the equity is $10,500 and the MLL is $10,000, the trader has a $500 buffer. If the trader withdraws $300, their equity drops to $10,200, but the MLL stays at $10,000. The buffer just shrank from $500 to $200. If the equity ever touches or goes below the active Maximum Loss Limit, it is a breach.

<u>**Fewpips Funded Account Rules**</u>

Example Visual:

- Start: $100,000 → Low: $95,200 → Loss: $4,800 → **OK**
- Start: $100,000 → Low: $92,600 → Loss: $7,400 → **Violation**

3. **Consistency Rule <u>(Funded Only)</u>**

No single trading day may exceed 40% of total accumulated profit.

<u>Example:</u>
If profit is $1,000, no single day can exceed $400.

4. **Minimum Trading Days**

<u>**Fewpips 1 - Step:**</u>
$5,000: 5 Minimum trading days.
$10,000: 4 Minimum trading days.
$25,000: 3 Minimum trading days.
$50,000: 2 Minimum trading days.
$100,000: 2 Minimum trading days.

5 **News Trading Policy**
Trading prohibited during major high-impact news. 5 minutes before and 5 minutes after the event (FOMC, CPI, NFP, rate decisions)

6. **EAs & Bots -** *EAs/Bots permitted under <u>**STRICT**</u> compliance. Use of EAs requires **prior approval** and submission of strategy documentation. **NO** EA's on Funded accounts.*

<u>Prohibited:</u>
- HFT
- Latency arbitrage
- Tick Manipulation
- Extreme grids/martingales
- Replication across multi-IPs.
- Copy trading.

7. **Prohibited Activities**
• Hedging between Multiple accounts.
• Multi-IP Abuse
• Artificial volume creation
• Arbitrage exploitation.
• Multi-account scaling abuse
• Trading accounts of third parties
• Sale of trader accounts
• Replication farms

Fewpips Funded Account Rules

• Feed exploitation
• One-sided betting
• Loss on a single trade should not exceed 2% of the account size (initial balance)
• Must use of SL and TP's **on Funded accounts**

8. **Allowed Instruments**
FX, indices, metals, commodities, crypto CFDs.

9. **All rules** apply to floating and closed trades.

10. **Violations** immediately breach the account.

11. **The system** always uses the lowest equity point for rule checks.

12. **Account Activity Requirements:** The Provider requires Traders to remain active to maintain their accounts. Accounts in the Challenge Phase will be marked inactive if no trades are placed for 14 consecutive days. Inactive accounts will be deactivated to maintain platform stability. The Trader can prevent inactivity by executing at least one trade within the required timeframe.

Fewpips 2-Step Funded Account Rules:

• Maximum Daily Loss Limit - 4%

• Maximum Loss Limit (MLL) - 8%

• Minimum Trading Days - 5 Days. *(Does not have to be consecutive)*

• 40% Consistency Rule of Daily Profit. *(No trade or day can profit more than 40%)*

• Profit Split: 80% up to 90%.

1.**Daily Loss Rule**
The Daily Loss Limit is calculated using the formula:

Start-of-day equity - the lowest floating equity of the day must not exceed the allowed percentage.

This rule applies to both open (floating) and closed trades.

Here are the Daily Loss Limits:
1. 2-Step: 4%

Example:
For a $100,000 Fewpips 2-Step Account:
The daily loss limit is 4%, which equals $4,000. If the trader starts the day at $100,000, the trader cannot lose more than $4,000 in total during that day. If the trader first makes a $2,000 profit, the daily limit increases to $6,000 for that day ($4,000 + $2,000 profit). If the total loss reaches that amount, including open trades, the account will be breached.

If the account is $100,000 with a 4% Daily Loss Limit and the trader loses $4,000 in one day, they will breach the Daily Loss Limit making the trader breach the account.

Example Visual:
- Start: $100,000 → Low: $97,200 → Loss: $2,800 → **OK**
- Start: $100,000 → Low: $95,600 → Loss: $4,400 → **Violation**

2. **Maximum Loss Limit**

The Maximum Loss Limit (MLL) is a trailing loss limit that moves up as the account makes profits, but it never moves down after losses, and it can never go above the starting balance.

On all Fewpips accounts, the MLL is a trailing Maximum Loss Limit.

Here are the Maximum Loss Limits:

Fewpips 2 - Step:

$5,000: 8%
$10,000: 8%
$25,000: 8%
$50,000: 8%
$100,000: 8%

Key points:
- It only increases with profit.
- It never decreases with losses.
- It is capped at the initial account balance.
- Withdrawals do not reset or reduce the MLL; it stays at the highest level it has ever reached.

Example:
For a $10,000 Fewpips 2-Step Account (8% trailing Maximum Loss Limit).

Start: Equity $10,000 → Maximum Loss Limit breach point = $9,200 (8% below $10,000).

Fewpips Funded Account Rules

• After +$200 profit: Equity $10,200 → Maximum Loss Limit moves up to $9,400.
• Then -$100 loss: Equity $10,100 → Maximum Loss Limit stays at $9,400 (it never moves down).
• Then +$300 profit: Equity $10,400 → Maximum Loss Limit moves up to $9,700
• Then +$500 profit: Equity $10,900 → Maximum Loss Limit reaches $10,000 (capped at the initial balance).

If the equity is $10,900 and the MLL is $10,000, the trader has a $900 buffer. If the trader withdraws $300, their equity drops to $10,600, but the MLL stays at $10,000. The buffer just shrank from $900 to $600. If the equity ever touches or goes below the active Maximum Loss Limit, it is a breach.

Example Visual:
- Start: $100,000 → Low: $95,200 → Loss: $4,800 → **OK**
- Start: $100,000 → Low: $92,600 → Loss: $7,400 → **Violation.**

3. **Consistency Rule**
No single trading day may exceed 40% of total accumulated profit.

Example:
If profit is $1,000, no single day can exceed $400.

4. **Minimum Trading Days**
All evaluations require a minimum of 5 active trading days.

5 **News Trading Policy**
Trading prohibited during major high-impact news. 5 minutes before and 5 minutes after the event (FOMC, CPI, NFP, rate decisions).

6. **EAs & Bots -** *EAs/Bots permitted under* ***STRICT*** *compliance. Use of EAs requires* ***prior approval*** *and submission of strategy documentation.* ***NO*** *EA's on Funded accounts.*

Prohibited:
• HFT
• Latency arbitrage
• Tick Manipulation
• Extreme grids/martingales
• Replication across multi-IPs.
• Copy trading.

7. **Prohibited Activities**
• Hedging between Multiple accounts.
• Multi-IP Abuse
• Artificial volume creation
• Arbitrage exploitation.
• Multi-account scaling abuse
• Trading accounts of third parties
• Sale of trader accounts
• Replication farms
• Feed exploitation
• One-sided betting
• Loss on a single trade should not exceed 2% of the account size (initial balance)
• Must use of SL and TP's **on Funded accounts**

8. **Allowed Instruments**
FX, indices, metals, commodities, crypto CFDs.

9. **All rules** apply to floating and closed trades.

10. **Violations** immediately breach the account.

11. **The system** always uses the lowest equity point for rule checks.

12. **Account Activity Requirements:** The Provider requires Traders to remain active to maintain their accounts. Accounts in the Challenge Phase will be marked inactive if no trades are placed for 14 consecutive days. Inactive accounts will be deactivated to maintain platform stability. The Trader can prevent inactivity by executing at least one trade within the required timeframe.

Fewpips Funded Account Rules

Fewpips 3-Step Funded Account Rules:

• Maximum Daily Loss Limit - 5%

• Maximum Loss Limit (MLL) - 8%

• Minimum Trading Days - 5 Days. *(Does not have to be consecutive)*

• 40% Consistency Rule of Daily Profit. *(No trade or day can profit more than 40%)*

• Profit Split: 80% up to 90%.

---

1. Daily Loss Rule

The Daily Loss Limit is calculated using the formula:

Start-of-day equity - the lowest floating equity of the day must not exceed the allowed percentage.

This rule applies to both open (floating) and closed trades.

Example:
For a $100,000 Fewpips 3-Step Account:
The daily loss limit is 5%, which equals $5,000. If the trader starts the day at $100,000, the trader cannot lose more than $5,000 in total during that day. If the trader first makes a $2,000 profit, the daily limit increases to $7,000 for that day ($5,000 + $2,000 profit). If the total loss reaches that amount, including open trades, the account will be breached.

If the account is $100,000 with a 5% Daily Loss Limit and the trader loses $5,000 in one day, they will breach the Daily Loss Limit making the trader breach the account.

Example Visual:
- Start: $100,000 → Low: $96,200 → Loss: $3,800 → **OK**
- Start: $100,000 → Low: $94,600 → Loss: $5,400 → **Violation**

2. Maximum Loss Limit

The Maximum Loss Limit (MLL) is a trailing loss limit that moves up as the account makes profits, but it never moves down after losses, and it can never go above the starting balance.

On all Fewpips accounts, the MLL is a trailing Maximum Loss Limit.

<u>Fewpips Funded Account Rules</u>

<u>Fewpips 3 - Step:</u>
$10,000: 8%
$25,000: 8%
$50,000: 8%
$100,000: 8%
$200,000: 8%

Key points:
• It only increases with profit.
• It never decreases with losses.
• It is capped at the initial account balance.
• Withdrawals do not reset or reduce the MLL; it stays at the highest level it has ever reached.

Example:
<u>For a $10,000 Fewpips 3-Step Account (8% trailing Maximum Loss Limit).</u>

Start: Equity $10,000 → Maximum Loss Limit breach point = $9,200 (8% below $10,000).

• After +$200 profit: Equity $10,200 → Maximum Loss Limit moves up to $9,400.
• Then -$100 loss: Equity $10,100 → Maximum Loss Limit stays at $9,400 (it never moves down).
• Then +$300 profit: Equity $10,400 → Maximum Loss Limit moves up to $9,700
• Then +$500 profit: Equity $10,900 → Maximum Loss Limit reaches $10,000 (capped at the initial balance).

If the equity is $10,900 and the MLL is $10,000, the trader has a $900 buffer. If the trader withdraws $300, their equity drops to $10,600, but the MLL stays at $10,000. The buffer just shrank from $900 to $600. If the equity ever touches or goes below the active Maximum Loss Limit, it is a breach.

Example Visual:
- Start: $100,000 → Low: $95,200 → Loss: $4,800 → **OK**
- Start: $100,000 → Low: $92,600 → Loss: $7,400 → **Violation**

<u>Fewpips Funded Account Rules</u>

3. <u>**Consistency Rule**</u>
No single trading day may exceed 40% of total accumulated profit.

<u>Example:</u>
If profit is $1,000, no single day can exceed $400.

4.. **Minimum Trading Days -** *(Does not need to be consecutive)*

<u>**Fewpips 3 - Step:**</u>
$10,000: 5 Minimum trading days.

11. **The system** always uses the lowest equity point for rule checks.

12. **Account Activity Requirements:** The Provider requires Traders to remain active to maintain their accounts. Accounts in the Challenge Phase will be marked inactive if no trades are placed for 14 consecutive days. Inactive accounts will be deactivated to maintain platform stability. The Trader can prevent inactivity by executing at least one trade within the required timeframe.

Fewpips Instant Rules: *No challenge phase - you receive your Fewpips Funded Account instantly without evaluation.*

• Maximum Daily Loss Limit - N/A

• Maximum Loss Limit (MLL) - *See Below*

• Minimum Trading Days - *See Below*

• Profit Split: Up to 90%

---

1. **Maximum Loss Limit**

The Maximum Loss Limit (MLL) is a trailing loss limit that moves up as the account makes profits, but it never moves down after losses, and it can never go above the starting balance.

On all Fewpips accounts, the MLL is a trailing Maximum Loss Limit.

Maximum Loss Limit Instant Account Per Account:

$3,000: 5%
$5,000: 6%
$10,000: 7%.
$25,000: 9%
$50,000: 10%

Fewpips Funded Account Rules

Key points:

• It only increases with profit.
• It never decreases with losses.
• It is capped at the initial account balance.
• Withdrawals do not reset or reduce the MLL; it stays at the highest level it has ever reached.

Example:

For a $10,000 Fewpips Instant (7% trailing Maximum Loss Limit).

Start:
Equity $10,000 → Maximum Loss Limit breach point = $9,300 (7% below $10,000).

• After +$200 profit: Equity $10,200 → Maximum Loss Limit moves up to $9,500.
• Then -$100 loss: Equity $10,100 → Maximum Loss Limit stays at $9,500 (it never moves down).
• Then +$300 profit: Equity $10,400 → Maximum Loss Limit moves up to $9,700
• Then +$500 profit: Equity $10,900 → Maximum Loss Limit reaches $10,000 (capped at the initial balance).

If the equity is $10,900 and the MLL is $10,000, the trader has a $900 buffer. If the trader withdraws $300, their equity drops to $10,600, but the MLL stays at $10,000. The buffer just shrank from $900 to $600. If the equity ever touches or goes below the active Maximum Loss Limit, it is a breach.

Example Visual:

- Start: $10,000 → Low: $9,300 → Loss: $700 → **OK**
- Start: $10,000 → Low: $9,100 → Loss: $900 → **Violation**

3. **Consistency Rule**

No single trading day may exceed 40% of total accumulated profit.

Example:

If profit is $1,000, no single day can exceed $400.

<u>Fewpips Funded Account Rules</u>

4. **Minimum Trading Days**
- $3,000: 5 Days
- $5,000: 4 Days
- $10,000: 3 Days
- $25,000: 2 Days
- $50,000: 2 Days

5. **News Trading Policy**
Trading prohibited during major high-impact news. 5 minutes before and 5 minutes after the event (FOMC, CPI, NFP, rate decisions).

6. **EAs & Bots -** *EAs/Bots permitted under **<u>STRICT</u>** compliance. Use of EAs requires **prior approval** and submission of strategy documentation. **NO** EA's on Funded accounts.*

<u>Prohibited:</u>
• HFT
• Latency arbitrage
• Tick Manipulation
• Extreme grids/martingales
• Replication across multi-IPs.
• Copy trading.

7. **Prohibited Activities**
• Hedging between Multiple accounts.
• Multi-IP Abuse
• Artificial volume creation
• Arbitrage exploitation.
• Multi-account scaling abuse
• Trading accounts of third parties
• Sale of trader accounts
• Replication farms
• Feed exploitation
• One-sided betting
• Loss on a single trade should not exceed 2% of the account size (initial balance)
• Must use of SL and TP's **on Funded accounts**

8. **Allowed Instruments**
FX, indices, metals, commodities, crypto CFDs.

9. **All rules** apply to floating and closed trades.

10. **Violations** immediately breach the account.

11. **The system** always uses the lowest equity point for rule checks.

12. **Account Activity Requirements:** The Provider requires Traders to remain active to maintain their accounts. Accounts in the Challenge Phase will be marked inactive if no trades are placed for 14 consecutive days. Inactive accounts will be deactivated to maintain

platform stability. The Trader can prevent inactivity by executing at least one trade within the required timeframe.

For All Funded Accounts:

Account Activity Requirements: The Provider requires Traders to remain active to maintain their accounts. Accounts in the Sim Funded Phase will be marked inactive after 14 consecutive days of no trading. Inactive accounts will be deactivated to maintain platform stability. The Trader can prevent inactivity by executing at least one trade within the required timeframe.

Withdrawal:

Profit Split: For profit split, the user will get 80% for the first three withdrawals, then 90% permanently for 1/2/3-Step Accounts. For Instant accounts, the user will get 70% for the first three withdrawals, then 80% for the following 3 withdrawals, and then 90% from the 7th withdrawal onwards. The profit split is based on closed trades. You earn your profit share after closing trades that result in a profit. When you request a withdrawal, the amount you can withdraw is determined by your profit share from closed trades, provided you meet the payout requirements. So, the profit split is calculated on the profits you've realised from closed trades, not on open trades.

Automated Account Upgrade:

Prior to being upgraded to a Funded account, a human interaction will take place to audit the account. The audit will consist of rule criteria, violations checks and to ensure the user has fully complied with the terms and conditions set out by Fewpips.

Fewpips Funded Account Rules
