

FEWPIPS FUTURE BASED CFDs

Instant Account Rules

No challenge phase — immediate simulated funded access | MetaTrader 5

The Fewpips Future Based CFDs - Instant Account provides immediate access to a simulated funded account without any prior evaluation phase. There is no challenge to complete — you begin trading immediately. Because the trader has not passed any prior evaluation filter, the risk parameters are more conservative than the 1-Step model.

These rules are designed to:

- Protect traders and simulated capital: By enforcing strict risk limits, we help traders avoid large losses and encourage disciplined trading habits that support long-term growth.
- Maintain fairness: Prohibited practices — such as latency trading, copy trading, and one-sided betting — are banned because they give unfair advantages and undermine genuine skill-based trading.
- Replicate real futures conditions: The trailing drawdown model and contract expiry rules mirror the environment of professional futures trading.

No reset is offered on the Instant Account. If the account is lost, a new purchase is required.

Account Sizes

	\$60,000

Key Metrics at a Glance

Metric	Future Based CFDs - Instant Account
Max Daily Loss	2% of starting day balance
Max Total Loss	4% trailing drawdown
Trailing Type	Equity peak trailing (floor never falls)
Profit Target	N/A — direct access, no evaluation
Min. Trading Days	5 days per cycle

Max. Evaluation Days	N/A
Consistency Rule	25% max profit in a single day
Payout Cycle	Every 21 calendar days
Profit Split	80% trader / 20% company
Withdrawal Cap	10% of account balance per cycle
Minimum Withdrawal	\$100 USD
Withdrawal Type	Full withdrawal (no partial)
Inactivity Cancellation	14 consecutive days
Reset	Not available — new purchase required if lost

Fewpips Future Based CFDs — Instant Account Rules

- Maximum Daily Loss Limit — 2% of starting day balance.
- Maximum Total Loss — 4% trailing drawdown from highest historical balance.
- Minimum Trading Days — 5 days per cycle.
- No profit target — direct access, no evaluation phase.
- Consistency Rule — No single trading day may exceed 25% of total cycle profit.
- No reset offered — if the account is lost, a new purchase is required.

1. Daily Loss Rule

The Daily Loss Limit is calculated using the formula:

Start-of-day balance minus the lowest floating equity of the day must not exceed the allowed percentage. This rule applies to both open (floating) and closed trades.

Daily Loss Limit — Future Based CFDs - Instant Account: 2% of starting day balance.

Example (Future Based CFDs - Instant Account, \$30,000 account):

The daily loss limit is 2%, which equals \$600.

If the trader starts the day at \$30,000, they cannot lose more than \$600 in total that day.

If the trader first makes a \$200 profit, the daily floor adjusts accordingly.

If the total loss reaches the limit, including open trades, the account will be breached.

Example Visual:

Start: \$30,000 → Low: \$29,500 → Loss: \$500 → OK

Start: \$30,000 → Low: \$29,350 → Loss: \$650 → Violation

2. Maximum Total Loss — Trailing Drawdown

The Maximum Total Loss is a trailing drawdown referenced to the highest historical balance reached by the account, not the starting balance. The floor only ever moves up — it never falls back down, even when the balance drops.

Maximum Total Loss — Future Based CFDs - Instant Account: 4% trailing from highest historical balance.

How it works:

- The drawdown floor = highest historical balance $\times$ (1 – 4%).
- Every time the balance exceeds its previous high, the floor rises proportionally.
- Once the floor rises, it never goes back down — even if the balance subsequently drops.

Example (Future Based CFDs - Instant Account, \$30,000 account, 4% trailing drawdown):

Starting balance \$30,000 → floor = $\$30,000 \times 96\% = \$28,800$.

Balance rises to \$31,000 → new floor = $\$31,000 \times 96\% = \$29,760$.

Balance rises to \$33,000 → new floor = $\$33,000 \times 96\% = \$31,680$.

Balance drops to \$32,000 → floor stays at \$31,680 (does not go back down).

If balance drops to \$31,679 → account violated.

The Instant Account has more conservative limits (2% / 4%) because the trader has not passed any prior evaluation filter. A tighter loss range acts as a selection mechanism and protects simulated corporate capital.

3. Minimum Trading Days

Future Based CFDs - Instant Account: 5 minimum active trading days per cycle. Days do not need to be consecutive.

Trades can be held open for however long the trader chooses. However, to qualify as an active trading day, at least 1 trade must be held open for 3 minutes or more. Trades held open for less than 3 minutes will not count toward the minimum trading day requirement.

4. Consistency Rule

No single trading day's profit may exceed 25% of the total profit for the current cycle.

The Instant Account applies a stricter consistency limit (25%) because direct access tends to attract more aggressive trading profiles that require tighter control. If this threshold is exceeded, the trader must continue trading to grow total profit until the flagged day represents 25% or less.

Example (Future Based CFDs - Instant Account, \$30,000 account):

If total cycle profit is \$1,000, no single day can exceed \$250.

*If a trader earns \$300 in one day, that day is flagged as inconsistent.
The trader must continue trading to grow total profit until that day
represents 25% or less of the new total.*

5. News Trading Policy

Trading is prohibited 5 minutes before and 5 minutes after high-impact news events. This applies to all phases and all cycles.

Restricted events include: FOMC, NFP, CPI, and interest rate decisions.

6. EAs & Bots

Expert Advisors (EAs) and automated bots are NOT permitted on the Future Based CFDs - Instant Account. All trading must be executed manually by the registered account holder.

7. Prohibited Activities

The following practices are strictly forbidden. Violations result in immediate account breach:

- Latency scalping / HFT / tick scalping — Exploiting server execution delays or price feed latency is not a legitimate trading strategy.
- Copy trading & managed accounts — Each account must be operated exclusively by the registered account holder.
- Third-party operation — Including real-time signals where a third party makes entry or exit decisions.
- Hedging between accounts — Placing offsetting positions across multiple Fewpips accounts is prohibited.
- Extreme martingale & grid strategies — Strategies that exponentially increase position size to recover losses are prohibited.
- One-sided betting — Placing oversized directional bets without structured risk management.
- Multiple IPs without justification — Connections from different countries or anonymous IPs without prior explanation are a red flag and subject to review.
- Feed exploitation — Use of outdated, external, or manipulated price feeds.

8. Allowed Instruments

The Future Based CFDs - Instant Account operates exclusively on MetaTrader 5 (MT5) using the Feed -F series of futures-based CFDs, including:

US30-F, US500-F, NAS100-F, GER40-F, UK100-F, XAUUSD-F, XAGUSD-F, Brent-F, Crude-F and others.

These instruments replicate real futures prices without overnight swap. They are not real contracts from CME, NYMEX, or any other regulated exchange.

9. Contract Expiry

All Future Based CFD instruments carry real expiry dates. Traders are responsible for monitoring contract expiry and closing or rolling positions before expiration. The Company is not liable for losses resulting from failure to manage contract expiry.

- Feed -F instruments carry rolling quarterly expiration managed by the provider.
- Positions held through an expiry date may be forcibly closed at the prevailing market price.

10. Rule Enforcement

- All rules apply to both open (floating) and closed trades.
- The system always uses the lowest equity point of the day for daily loss rule checks.
- Violations immediately breach the account. There is no grace period.
- All payouts and results are subject to ex-post review. Fewpips reserves the right to audit any account before processing a withdrawal.

11. Account Inactivity

Accounts with no trading activity for 14 consecutive calendar days will be automatically cancelled and deactivated. A single executed trade within the 14-day window resets this timer.

12. Account Limit per Trader

Each trader may hold a maximum of 3 simultaneous Future Based CFD accounts, regardless of model.

Trades can be held open for however long the trader chooses. To qualify as an active trading day, at least 1 trade must be held open for 3 minutes or more.

13. Position Limits

Position limits per instrument and/or account size are currently pending definitions. Clients will be notified via the website and platform communications once confirmed.

FEWPIPS FUTURE BASED CFDs

Instant Account Terms

Fewpips Future Based CFDs Instant Account Terms

These Fewpips Future Based CFD Instant Account Terms (the "Instant Terms") govern your participation in the trading simulations offered by Fewpips (Business Registration No. 203341234), with its registered office at La Place Creole Building, Rodney Bay, Gros Islet, St. Lucia.

By purchasing a Future Based CFDs - Instant Account, you (the "Client" or "Counterparty") agree to be legally bound by these Terms. Participation is prohibited if these Terms are not accepted in their entirety.

SECTION 1: ACCOUNT ARCHITECTURE

1.1 Account Model

Fewpips Future Based CFDs provides one Instant Account model — direct access to a simulated funded account with no prior evaluation phase. Available account sizes: \$10,000 | \$30,000 | \$60,000.

1.2 Operational Trading Guidelines

Adherence to the following metrics is mandatory. Failure to comply results in immediate account forfeiture.

Metric	Future Based CFDs - Instant Account
Max Daily Loss	2% of starting day balance
Max Total Loss	4% trailing drawdown
Trailing Type	Equity peak trailing (floor never falls)
Profit Target	N/A — direct access, no evaluation
Min. Trading Days	5 days per cycle
Max. Evaluation Days	N/A
Consistency Rule	25% max profit in a single day
Payout Cycle	Every 21 calendar days
Profit Split	80% trader / 20% company
Withdrawal Cap	10% of account balance per cycle
Minimum Withdrawal	\$100 USD
Withdrawal Type	Full withdrawal (no partial)
Inactivity Cancellation	14 consecutive days

Reset	Not available — new purchase required if lost
--------------	---

1.3 The 25% Consistency Rule

To ensure professional risk management and prevent reliance on a single high-impact day, the 25% Consistency Rule applies to all Future Based CFDs - Instant Accounts.

- The Rule: No single trading day's profit can exceed 25% of the total profit generated during a withdrawal cycle.
- The Enforcement: If a trader violates this rule, Fewpips reserves the right to deduct the inconsistent profits and reset the cycle, or invalidate the payout request for that cycle.

1.4 Activity & Maintenance

Accounts must remain active. Fourteen (14) consecutive calendar days of zero trading activity will result in the account being marked as inactive and automatically cancelled. A single executed trade within the 14-day window resets this timer.

1.5 Technical & Strategy Restrictions

- Exploitation: Utilising system flaws or data-feed latencies is strictly prohibited.
- Hedging: Cross-account hedging — within Fewpips or across different firms — to manipulate risk is forbidden.
- Expert Advisors (EAs) & Bots: EAs and automated bots are NOT permitted on any Future Based CFD account. All trading must be executed manually by the registered account holder.
- Trading Style Consistency: Traders must maintain a consistent trading style. Switching from automated to manual trading (or vice versa) is prohibited.
- Hardware Limits: Access is restricted to a maximum of three (3) unique devices. Inconsistent login patterns may trigger a security review.

SECTION 2: PROHIBITED TRADING METHODOLOGIES

The Client is strictly prohibited from employing the following practices, which undermine the integrity of the professional simulation:

- Latency & Arbitrage: Exploiting price delays, slow data feeds, or execution latencies.
- HFT & System Abuse: High-frequency trading, tick scalping, or ultra-high-speed software designed to exploit the simulated environment.
- Copy Trading: Mimicking other traders or utilising third-party account management or signal services.
- Group Coordination: Group trading or manipulating outcomes via connected accounts.
- Extreme Martingale & Grid Strategies: Strategies that exponentially increase position size to recover losses.
- One-Sided Betting: Placing oversized, directional bets without structured risk management.
- Hedging Between Accounts: Placing offsetting positions across multiple Fewpips accounts.
- Feed Exploitation: Use of outdated, external, or manipulated price feeds.

- Multiple IPs Without Justification: Connections from different countries or anonymous IPs without prior explanation are a red flag and subject to review.
- Account Sharing or Sale: Trading accounts of third parties, sale of trader accounts, or operation of replication farms is strictly prohibited.

SECTION 3: REWARD DISBURSEMENT & KYC

3.1 Objectives

Our Customer Due Diligence (CDD) and Enhanced Due Diligence (EDD) protocols are designed to mitigate money laundering risks and ensure compliance with global sanctions.

3.2 Verification Process

- Timeline: Verification is triggered prior to the first reward disbursement.
- Required Documentation: Government-issued photo ID (Passport or National ID) and, where requested, Proof of Address (utility bill or equivalent).
- KYC Deadline: Clients have exactly 30 calendar days from account activation to complete KYC. Failure to do so results in account invalidation.
- Expired Documents: Expired identification documents result in immediate rejection.
- Internal Handling: All data is processed internally by authorised Fewpips compliance personnel. No data is sold to external marketing aggregators.

3.3 Payout Eligibility

All payouts are subject to a post-trade audit. Fewpips reserves the right to verify that all trades were executed in accordance with Section 2 before processing any withdrawal.

3.4 Withdrawal Fees

All rewards are subject to a processing and administration fee of 3% to cover third-party transaction costs. This fee is automatically deducted from the requested withdrawal amount.

SECTION 4: FINANCIAL SPECIFICATIONS

4.1 The Trading Cycle

- A Trading Cycle is the performance window required for payout eligibility.
- The cycle begins automatically the moment the Client places their first trade, or following a prior payout.
- Payout cycle: Every 21 calendar days.

4.2 Cycle Maintenance & Quality Rules

To remain eligible for a Performance Reward, the Client must satisfy all of the following during each cycle:

- **Active Trading Days:** You must be active on at least 5 separate trading days during your cycle.
- **The 3-Minute Quality Rule:** A day is only recorded as Active if it contains at least one trade held open for 3 minutes or longer. Trades can be held open for however long the trader chooses — the 3-minute minimum only determines whether a day qualifies as active.
- **The 25% Consistency Rule:** No single trading day's profit can exceed 25% of the total profit for that cycle. If this threshold is exceeded, the trader must continue trading to grow total profit until the flagged day falls within the permitted percentage.
- **Net Profit Requirement:** Rewards are only eligible if the account balance exceeds the initial starting balance (net profit above zero).
- **Net Loss Extension:** If a cycle ends in a net loss, it is automatically extended until the account returns to profit, provided no loss limits are breached.

4.3 Payout Logistics & Limits

Minimum withdrawal request: \$100 USD.

Fewpips Future Based CFDs - Instant Account — Withdrawal Cap (10% of account balance per cycle):

Account Size	Withdrawal Limit Per Cycle
\$10,000	\$1,000
\$30,000	\$3,000
\$60,000	\$6,000

- **Full Withdrawal Policy:** Full withdrawals are required per cycle. Partial withdrawals are not permitted. The trader may leave any amount they wish as a base to continue trading.
- **Open Positions:** No open positions are permitted when requesting a withdrawal. All positions must be fully closed before a withdrawal request can be submitted.
- **Processing Timeline:** Requests undergo an audit (24–48 business hours) followed by processing (24–48 business hours). Total estimated lead time is 5–7 business days.
- **Withdrawal Cap Justification:** The 10% cap is an operational sustainability mechanism. It limits maximum exposure to tail-risk events and reflects the absence of a prior evaluation filter.

4.4 Profit Split

The default profit split is 80% to the trader and 20% to the company.

4.5 Account Refresh

- **Credential Retention:** Clients keep their same trading credentials after a payout.
- **Balance Reconciliation:** Upon confirmation of a withdrawal, the account balance is updated to the new starting equity.
- **New Cycle:** A new 21-day countdown begins automatically with the Client's next executed trade.

4.6 Fees and Charges

- Transaction Fee: All deposits and withdrawals are subject to a 3% processing fee.
- Deposit Handling: A 3% fee is added to the transaction total to ensure the net intended amount is credited.
- Withdrawal Handling: The 3% fee is automatically deducted from the requested payout amount.
- Policy Updates: Fewpips reserves the right to adjust fee structures at its discretion. Continued use following notification constitutes acceptance.
- Commission Structure: All trades executed on the MT5 platform are subject to a per-trade commission charged upon both the opening and closing of each position:
 1. Forex: \$3 per standard lot (one side) — \$6 total per standard lot round trip
 2. Indices: \$3 per standard lot (one side) — \$6 total per standard lot round trip
 3. Commodities/Metals: \$3 per standard lot (one side) — \$6 total per standard lot round trip
 4. Crypto: 0.04% of the opening price per lot

Commissions are charged on a per-side basis and apply equally across all Future Based CFDs Instant Account sizes.

SECTION 5: REFUND & TERMINATION POLICY

5.1 Service Activation

Execution of the first trade constitutes a formal request for immediate service performance. At this moment, the Client waives the right to a refund under standard consumer withdrawal laws.

5.2 Refund Eligibility

- Unactivated Accounts: A refund may be requested within 7 days of purchase, provided no trades have been placed.
- Breach Termination: Accounts closed due to rule violations (drawdown breach or prohibited practices) are not eligible for any refund.
- No Reset: The Instant Account does not offer resets. If the account is lost, a new purchase is required.
- Non-Activation: Accounts not activated within 30 days of purchase will be archived.

SECTION 6: DISPUTE & CHARGEBACK MANAGEMENT

6.1 Fraudulent Disputes

Raising a false dispute — claiming services were not rendered when they were — will result in a permanent ban and immediate forfeiture of all account progress.

6.2 Resolution Protocol

If a dispute is raised, the associated account is immediately paused. To reactivate an account, the Client must:

1. Withdraw the dispute with their financial institution.
2. Provide Fewpips with official proof of withdrawal.
3. Allow up to 45 to 60 business days for risk management to verify the documents and reactivate credentials.

SECTION 7: FINAL LEGAL PROVISIONS

- Neutral Interpretation: Any linguistic ambiguity shall be resolved neutrally and not automatically against Fewpips as the drafting party.
- Governing Law: This Agreement is governed by the laws of St. Lucia. Any disputes shall be settled exclusively in the courts of St. Lucia.
- Local Compliance: The Client is solely responsible for ensuring their participation does not violate the local laws of their jurisdiction of residence.
- Modifications: Fewpips reserves the right to adjust these metrics and terms at its discretion. Clients will receive 7 days' notice of significant changes via the registered email address. Continued use of the platform following notification constitutes acceptance of the updated terms.
- Non-Disparagement: Clients agree not to engage in disparagement or smear campaigns against Fewpips on any public forum. Such conduct is grounds for immediate account termination.
